Characteristics

Treatment: Clear AZOL H3.2 or CCA treated (for exterior, continuous wetting).

Finish: Rough saw, grip tread, fougher header or standard machine gauged.

Grades

Merch: A great low cost decking option. This grade allows knots and a small amount of pith, resulting in a knotty "character" finish. Treat with CCA H3.2 or H4 and a merch deck will last for decades.

F1: This is our highest selling grade, and is suitable for most applications. Knots up to a 3rd of the cross section are allowed with no pith.

Dressing: Dressing grade is mostly clear timber with some small enclosed knots allowed. Very attractive this suits premium applications where a small amount of character is desirable.

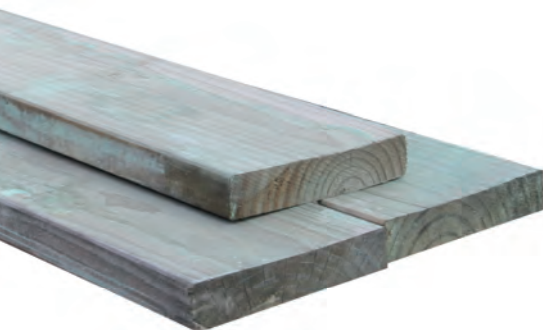

Premium: This grade is a mix of our F1 and clear grade timber and is suitable for mostly high quality jetties and outdoor decks.

#2 Clear: #2 Clear grade is decking that is free of any knots or defects for 3 out of the 4 sides and is suitable for premium architectural applications. Perfect for staining this grade can be adapted for a variety of looks.

#1 Clear: Completely free of any knots and defects this grade is the ultimate in pine decking where all four sides are exposed.

OUTDOOR TIMBER | Outdoor gauged

We supply a range of outdoor treated timber products for use anywhere exposed to the elements. Outdoor treated timber can be supplied in a range of grades, treatments, and states to suit any exposed application. A great replacement to traditional hardwoods, our New Zealand pine offers significant cost savings as well as being good looking, durable and high performing. It is also a completely renewable resource.

Characteristics

Treatment: CCA, H4, H5, H6 & H6+, ACQ H5.

Grade: Merch grade, cut of log, frame 2, frame 1, frame 1 premium, MSG8, VSG8, F7, premium, dressing, clears.

State: Dry, wet, kiln dried, air dried.

Examples of Use

Decking: The standard for decking, match the treatment and grade to your application and you will have a long lasting, functional deck that is much more economical than traditional hardwoods.

Outdoor Furniture: NZ Pine timber is an extremely adaptable wood, and is perfect for outdoor furniture manufacturing. Available in a wide range of visually selected grades to suit all purposes.

Structural: Using the structural grades, outdoor gauged timber is perfect for a premium structural building material. A more visually appealing finish, it is a great option for outdoor structures that are exposed to viewing.

Characteristics

Treatment: CCA H4, H5, H6 & H6+, ACQ H5.

Grade: Merch grade, cut of log, frame 2, frame 1, frame 1 dressing, MSG8, VSG8, F7, premium, dressing, clears.

State: Dry, wet, kiln dried, air dried.

Examples of Use

Structural: Perfect for outdoor structures, our range of rough sawn timber is manufactured to last the test of time, as well as meet high structural standards.

Landscaping: Using higher treatments (H5 and above), our outdoor range is ideally suited to getting down and dirty in the ground.

Jetties: When treated to H6 or H6+ the outdoor ranges of timber are designed to last 50 years in the marine environment.
